

BioVex HVS

A simple, convenient way to activate BIOVEX.

- Economical
- Eliminates need for manual mixing and dilution
- Automatically refills reservoir with active product as needed
- No electricity or wiring required
- Easy to install, only one water connection required
- Safely eliminates exposure to concentrated product
- On-demand dispensing eliminates waste

Hands-Free Activation

The BioVex HVS is a cost-efficient system that eliminates the need for manual mixing of product and acid. The unit dilutes the activated concentrate and insures consistency. Requires no electricity or wiring. BioVex HVS is designed for users with continuous or batch requirements for activated product. BioVex HVS is reliable and has been proven in the field for small to large volumes of generated product. BioVex HVS increases efficiency by automatically refilling the solution reservoir with fresh active product as needed, eliminating the need for measuring and possibility of spills. BioVex HVS is easy to install. Only one water connection is required to provide activation of product to meet a wide range of applications.
